

How to install FXSeeker on Windows

Step 1

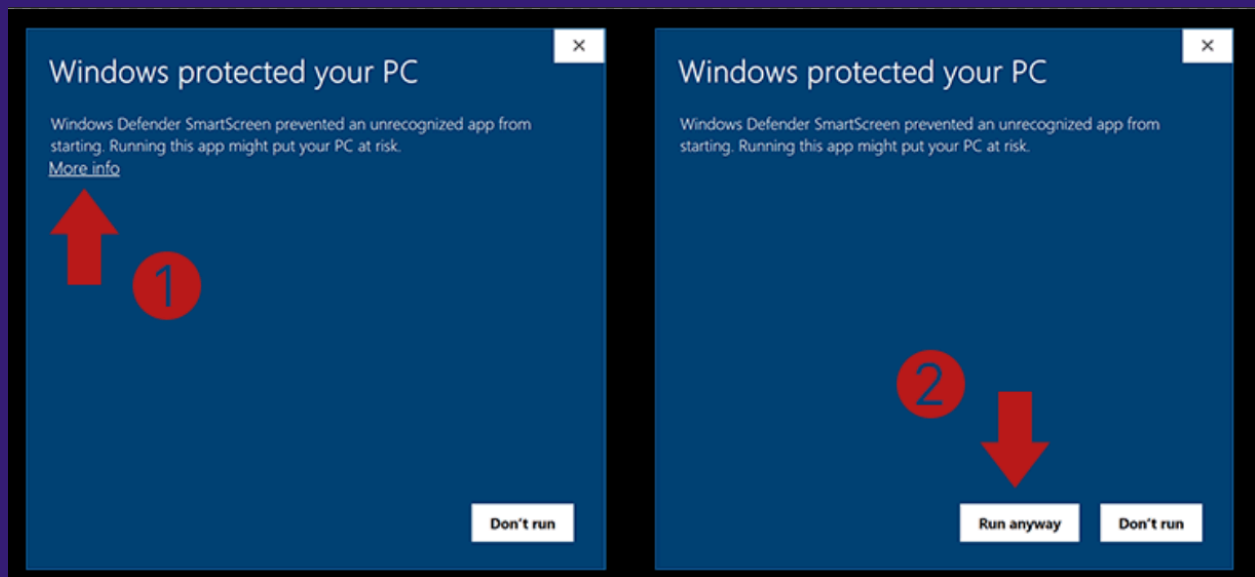

Download the plugin file from the email and extract the RAR file.

Note: Close Premiere Pro on your device.

Step 2

Double-tap the exe file (fxseeker.exe). An annoying message will pop up.

Click “More info” and then “Run anyway”. Then, follow the Installation Wizard’s steps.

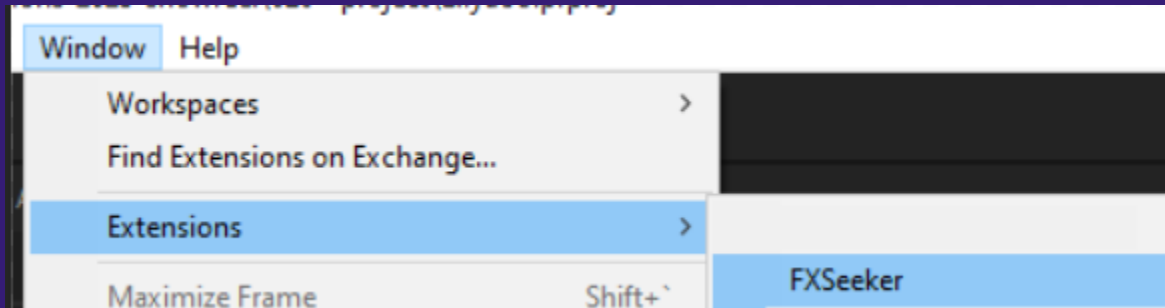

Step 3

Open Premiere Pro > Open any project.

Make sure you can see & click on **Windows > Extensions > FXSeeker**.

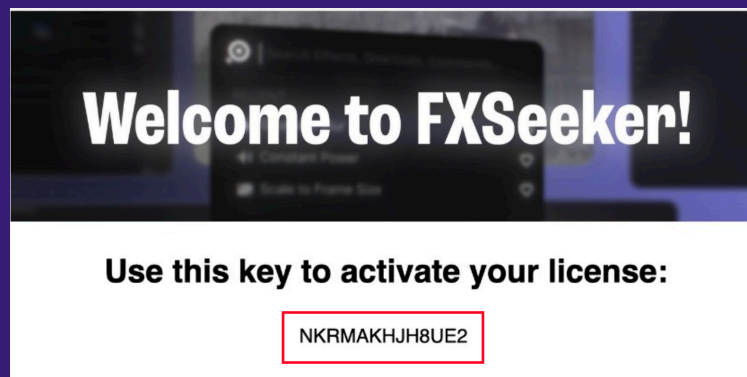

If you don't see FXSeeker, try restarting your computer.

Step 4

Press **Shift + V** to open FXSeeker.

Go to your email inbox and copy your FXSeeker License Key.

Enter your License Key > “Activate” > Enjoy FXSeeker!
